- The Children's Home has directly and indirectly supported 3,241 jobs, including our employees, independent contractors, and business entities providing services to The Children's Home, which generated \$147M in earnings in the Cincinnati Region over the last five years.
- Our organization received over \$38M in **non-local revenue** over the last 10 years. These non-local dollars would not have circulated in the local economy without The Children's Home.
