## CHANGING GABE'S LIFE

We are helping kids like Gabe – a very bright, very inquisitive young man who has a world of potential. Gabe came to us with life circumstances so challenging that temporary custody was granted to a relative. Before he could even begin therapy to mitigate his anger, frequent outbursts, and tendencies to run away from class, he had to go through our medical management services because his guardian was literally handed a bag full of loose medication and was simply told it was Gabe's.

After our medical management services, Gabe began seeing one of our talented therapists and is making life changing progress. In fact, during a recent telehealth session he was absolutely gushing over a remote-control car he purchased with his own money, which he earned by himself. **Our agency is very proud of Gabe and the care provided by his therapist and we hope you are as well.**
